

Announcing Enhanced version 10!

General Benefits

- Written exclusively for modern operating systems such as Windows 10
- Takes full advantage of Microsoft Office Suites (version 2013 to 365) and will automatically benefit from any updates furnished by Microsoft
- Options for traditional desktop installation, cloud based access or a combination of both
- New “Ribbon” based menu system to better present respective menu items and tasks
- Super-fast closing of accounting periods with “roll back” capability
- Simple manual interface to third party programs like Eldorado Utility Billing

Benefits to Existing Clients

- We based this version on our prior architecture to insure that existing customers can immediately use the program and not suffer thru a learning curve
- The system will close respective accounting periods in minutes!
- Major improvements in the Payroll module including manual or internet direct deposit, ability to reprint past transaction registers and streamline programming making this module bullet proof

Benefits to New Clients

- Ability to display cash balances anytime during the month and not have to wait to close an accounting period
- No need to enter invoices/vouchers by fund as our system automatically separates each line item by fund when posting and reporting
- No requirement to close the current fiscal year before beginning the new fiscal year. Saves a ton of data entry.

Considerations

- We will be offering special pricing consideration to existing clients who take advantage of this major upgrade as well as new clients currently using competitor products
- Our company is family owned and operated providing an improved experience to large impersonal corporate entities
